NLign Professional Services

NLign services are designed with your specific requirements and applications in mind. Our training and pricing options are tailored to best assist you and your company. From expert consulting to hands-on software training, and on-site technical staffing – we offer a wide range of services to accelerate implementation, maximize your software investment, and ensure ongoing success.

Training

NLign software training is led by certified instructors and includes hands-on workshops with real-world data and models. Our learning solutions are defined, designed, and delivered to meet your specific needs. Whether you're just getting started or require advanced instruction, our trained professionals will assist you in achieving your goals.

Classes are available at our Cincinnati headquarters or on-site to meet your needs and scheduling requirements. Training options include:

- Classroom Instruction
- On-Site Workshops
- Remote Web-Based Training

Mentoring Assistance

Jumpstart your software implementation with NLign Mentoring Assistance. Introducing new applications and methods can be challenging. We'll work side by side with your staff to provide mentoring, assist in setting up data and models, and help you deploy and adopt NLign into your working environment. Our collaborative mentoring service accelerates implementation and ensures technology transfer with a real-world learning experience that only NLign can provide.

Consulting

Put our years of experience to work and unlock the full efficiency of your processes, tools and resources. We offer a variety of consulting options to help you improve on current success or isolate areas of inefficiency, waste, and redundancy. We'll identify opportunities for automation/improvement and quantify your expected return on investment. Whether it is a long-term engagement requiring multiple resources, a one-time project, or an audit of current technology and processes, we're here to help.

We'll provide your team with a fully trained and dedicated resource giving you immediate and unlimited access to an NLign authority. As an NLign Analytics employee, your on-site resource will maintain the highest level of expertise with full access to our company's collective experience.

Some organizations may require temporary added technical resources for overflow work or to ensure on-time project delivery. We can supplement your staffing needs with on-demand project assistance. No matter if it's a long-term engagement or a short-term project support, NLign is here to help.
